Primary research interest is in augmenting human cognition. I am particularly interested in using state-of-the-art artificial intelligence technologies with ubiquitous computing to expand the human day-to-day experience.

Technical Skills

Programming:

python, C#, Javascript, Lisp
C++, Java

Platforms:

Unity (AR/VR/Mobile)
Android

AI tools:

Data analysis
Deep Learning
MLops

Ideation & planning
User studies
Analysis & reporting

Soft Skills

- Teamwork
- Communication
- Presentation
- Technical writing
- Leadership

augmenting human cognition. I am particularly interested in using state-of-the-art artificial intelligence technologies with ubiquitous computing to expand the human day-to-day experience.
